MVNO (mobile virtual network operator) – is a wireless communications services provider that does not own the wireless network infrastructure, but has the possibility to provide services.

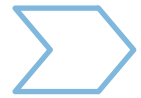

The ability to create high-tech business with minimal costs.

Ease of use.

Market entry threshold is low.

The ability to choose the appropriate business model.

A complete solution to start your own business as a virtual mobile operator

The ability to see the top-up online, «hot» billing, rates setting, promos and loyalty programs

Fully scalable system from 1000 subscribers to 1 000 000

Pro MVNO

Pro MVNO

This business pattern is suitable for medium and big companies that use their own ATS for connection between employees and branches.

Full MVNO

Full MVNO

This pattern makes it possible to manage all the processes, to create different business patterns and groups with your own rates and services. Furthermore the ability to develop your own applets for SIM-cards and for creating your sub-MVNO agents.

- Minimum order **400 SIM-cards**
- Balance credit limit line in billing system – **500\$**

Features

- Full MVNO allows to have full management of your services and offers
- Efficiently work as HNO, but without your own radio network
- There are your own SIM-cards, IMSI codes, own system of number assignment, interconnection rights and responsibility
- Maintain your own core networks
- Make your own rate plans
- Choose any name for GSM network
- Opportunities to use USSD, SMS, DATA
- Opportunity to use your own base of numbers
- Opportunity to use virtual numbers of operators

Preliminary start case:

Advantages of working with Tottoli GSM

- Quick and easy way to create your own MVNO.
- Using the technology VoIP, allows to use the existing infrastructure and significantly reduce the cost of calls to all directions.
- The ability to create high-tech business with minimal costs.
- In establishing your business model, you can use your own resources or ours, that gives you an opportunity to enter the market with minimal risk.
- Our billing panel allows to manage SIM-card activities fully and receive real-time statistics. You will have access to the information about location, SMS, USSD, data, create your groups and rates for them.
- Full MVNO is oriented to corporate client. It provides opportunities for the integration of its infrastructure and the use of FMC (use short number dialing within the company worldwide).
